Seminars - XXXII Cycle

NONPARAMETRIC SMOOTHING TECHNIQUES

Francesco Pauli

Università degli Studi di Trieste

July 5-6, 2017

Room ASID 20

Schedule

Wednesday	July 5	14.30 – 17.30
Thursday	July 6	10.00 – 13.00
		15.00 – 17.30

Abstract

The seminars will discuss semiparametric techniques for regression analysis, in particular kernel regression methods and the approach based on penalized splines. Within the latter approach estimation of semiparametric generalized model as mixed model in a Bayesian setting will be discussed.
