

Trusted smart statistics: a platform for modern official statistics

A seminar by Emanuele Baldacci

Director of Resources and CIO at Eurostat,
European Commission

9 April 2021 | 2:30 p.m.
Live Facebook @scienze statistiche unipd

Emerging information needs in new policy areas, such as the digital and green revolution, and the importance of timely statistics for quick decision require a transformation in the way official statistics are produced.

This new paradigm includes access to non-traditional sources, new algorithms-driven process for data processing and innovative dissemination modalities focus on insights from data.

Eurostat has launched in collaboration with the European statistical system a series of initiatives to modernize the organizational, technical and methodological framework to ensure high-quality statistical information is fit for users demand.
